

Precision Fabrication Technology Application

Enrollment for tuition reimbursement is limited. Admission is by application, competitive testing and interview with MAGLEV, Inc. and the Institute for Career Development. Acceptance to the CCAC South Campus does NOT guarantee admission into the Precision Fabrication Technology program.

Applicants to the program who are not currently CCAC South students will be required to take the CCAC placement exams. A score above 44 is required for the math skills algebra test, a score above 79 is required for the writing skills test, and a score above 84 is required for the reading skills test. Students with SAT or ACT scores above the 50th percentile will be exempt from placement testing. Verbal and math scores are reported separately.
